

Attorney Docket No.: 211465-00502  
Amdt. dated: March 30, 2006

### **REMARKS/ARGUMENTS**

Upon entry of the instant amendment, claims 6-10 are pending. Claim 6 has been amended to more particularly point out the Applicant's invention. It is respectfully submitted that upon entry of the Amendment, the Application is in condition for allowance.

### **CLAIM REJECTIONS- 35 U.S.C. § 102**

Claims 6-9 stand rejected under 35 U.S.C. § 102 (b) as being anticipated by Bantz, et al. US Patent No. 5,123,029 ("the Bantz, et al. patent"). In order for there to be anticipation, each and every one of the elements in the claim must be found in a single reference. It is respectfully submitted that the claims as amended recite subject matter not disclosed or suggested by the Bantz, et al. patent. In particular, the claims now recite that: "each wireless device including a digitizer responsive to a passive stylus and including means for monitoring pen-down events of said passive stylus in said mouse mode and emulating the movement of a mouse and the clicking of a mouse button; means for switching between a mouse mode and a pen mode, means for translating pen-down events into pen data packets and transmitting said pen data packets to said one or more servers for processing." The Bantz, et al. patent does not disclose or suggest such structure. Accordingly, there can be no anticipation. The Examiner is kindly requested to reconsider and withdraw this rejection.

### **CLAIM REJECTIONS- 35 U.S.C. § 103**

Claim 10 stands rejected as being unpatentable under 35 U.S.C. § 103 (a) over the Bantz, et al. patent and further in view of Sheu US Patent No. 5,781,715 ("the Sheu, et al. patent"). Claim 10 is dependent upon Claim 6. The Bantz, et al. patent was discussed above. The Sheu, et al. patent likewise does not disclose or suggest a system in which "each wireless device including a digitizer responsive to a passive stylus and including means for monitoring pen-down events of said passive stylus in said mouse mode and emulating the movement of a mouse and the clicking of a mouse button; means for switching between a mouse mode and a pen mode, means for translating pen-down events into pen data packets and transmitting said pen data

packets to said one or more servers for processing." Accordingly, the Examiner is respectfully requested to reconsider and withdraw this rejection.

Respectfully submitted,

KATTEN MUCHIN ROSENMAN LLP
